## **COMMUNIQUE last quarter 2012**

**The 2012 HQA annual Report is in the final stages of being finalised. Due to the end of the year drawing in so quickly the findings of the Report will be released at a meeting of the CAB on 23 January 2013. The Industry Report and Scheme Reports will be released to members and participants on the same day and scheme presentations will follow immediately thereafter.**

**Some very important development work was performed this year, significantly enhancing the value of the HQA Report and the ease of future participation:**

- HQA's comprehensive list of indicators have been scientifically defined and documented.**
- HQA has collected data from capitation providers for the first time.**
- The 2012 Reports will contain results based on 2011 data comparative to 2010.**
- The risk adjustment and scoring methodologies have been reviewed and improved.**

**HQA is committed to report on its findings earlier in a year and it believes that the developments of 2011 and 2012 will allow it to release its 2013 Report before end of July 2013.**

**HQA has started with the development of a website in order to enhance communication and sharing of information with its members and relevant stakeholders. HQA would like to display the logos and names of its members and service providers on the website and will soon be contacting you in this regard. Developing the website is also an attempt to strengthen the HQA brand and to enhance the awareness in the market of the value of measuring clinical quality.**

**Please diarise the following meetings for 2013:**
